Quality Assurance

Under ASTA's stringent guidelines, every document is analyzed, deciphered, translated, formatted, proofread and proofread again.

Our Workflow Methodology takes advantage of crucial human dynamics such as an aversion to failure and the drive to succeed... Knowing that another certified translator is waiting to proofread their work for a 2nd level or Final (3rd level) review, we find that the initial translators are particularly attentive to detail and quality assurance. By the time a document reaches the certification/approval stage the new translated version is, in essence, a perfect match of the original in intent and all salient aspects.

Timeliness

Our unique Workflow Methodology leverages geographic placement, the Internet and the professionalism of great minds to deliver high quality translation projects in the shortest amount of time. In addition to our in-house experts, a large number of our certified translators are strategically deployed across global time zones in "Virtual translation tag-teams." This methodology ensures a 24-7 "around-the-clock" translation course of action.

Competitive Pricing

Our advanced processes allow us to be price competitive while preserving our high quality standards and our ability to meet the most demanding time constraints. Our rates are fair and our customers are never faced with surprise fees.

No other document translation service provider can match our precision, expertise, and our dedication to absolute customer satisfaction – PERIOD.

ALL LANGUAGES - AFFORDABLE RATES.
